FOR IMMEDIATE RELEASE

The Village of Lake in the Hills Public Works Department will be conducting semi-annual hydrant flushing starting Monday, April 19, 2021. All hydrants west of Randall Road will be flushed from April 19 through April 23. All hydrants east of Randall Road will be flushed from April 26 through April 30.

Hydrant flushing is a vital component of the Village's ongoing maintenance program. All hydrants are operated during the two week process which enables Village staff to identify any necessary repairs and ensures all hydrants are in proper working order. Flushing also removes unwanted sediment that collects in water mains over time. The removal of this sediment improves water quality and reduces production costs.
