Lake in the Hills initiates phase I construction of new police department building: temporary relocation of Veterans Memorial

Lake in the Hills, IL – The Village of Lake in the Hills is excited to announce the commencement of Phase I for the construction of the new Police Department building. Site work is currently underway and Phase I will primarily focus on site development and preparation for the forthcoming facility.

As part of this phase, the construction team will be carefully removing the current Veterans Memorial located within the construction site. However, it's important to note that this removal is only temporary. The memorial will be respectfully stored throughout the duration of the project and will be reinstated upon the completion of the new building.

In alignment with our commitment to honor and commemorate our veterans, the relocated memorial will be positioned between the new facility, Village Hall, and closer to the roadway. This will provide more visibility for motorists and the public, ensuring the Veterans Memorial remains a significant focal point of our community's municipal identity.

The Village of Lake in the Hills understands the sentimental value attached to the commemorative bricks that adorn the current memorial. Therefore, all previously purchased bricks will be safely removed, meticulously stored, and subsequently reinstalled as part of the reassembly process. As part of the transition period, the commemorative brick program will be temporarily suspended.

Additionally, The Village of Lake in the Hills recognizes the importance of keeping the community informed throughout this transition. Additional communication will be disseminated later during the construction process regarding the timing of the reinstallation of the Veterans Memorial.
